THE RIGHT TOOLS FOR THE JOB

FocusNet Technology has strategic alliances with leading industry hardware and software vendors, allowing us to deliver the best solutions anywhere. We take full responsibility for every project we undertake.

FocusNet Technology offers premium software and hardware solutions to our clients, with various products to suit a broad spectrum of industries. Our specific and targeted approach to systems solutions allows our clients to experience total confidence in our service and be reassured that their best interests are kept front of mind by partnering with us.

Our focus is customer satisfaction, and we have a passion for cultivating partnerships and lasting relationships better to understand the particulars of your industry and business requirements. This allows us to assist you in transforming the way you do business and connect with your customers.

We understand your need to be transparent, dynamic and agile, leverage new data sources, and work anytime, any place.

Some our partners:

We provide a comprehensive range of office technology to meet business requirements, including PC's, laptops, our very own FocusNet Thin Client and everything in between. We also supply telephony hardware in line with our very own FocusNet PABX and are Mitel certified – so replacing Mitel equipment is not out of the question.

To meet your I.T. network hardware needs, FocusNet Technology will produce hardware specifications and arrange for the purchase and delivery of the specified hardware.

We recommend sourcing hardware from a reputable provider that is backed by competitive warranties and exceptional after-sales service.

FocusNet Technology will commission, install, and (where necessary) provide training for the hardware we sell, resulting in total value from your purchase.
