UNIQUE INDUSTRY PRACTICES
NEED UNIQUE I.T. PARTNERSHIPS.

✔ Improved productivity through software tailored to your specific requirements.

✔ Specialised packages for unique functions.

✔ Cost savings through use of appropriate development approaches (agile development, pilot testing and modular development).

✔ Peace of mind from guaranteed quality of product achieved through project management, and careful/ professional approach to implementation.

CUSTOM BUILT TO EMPOWER YOUR BUSINESS

FocusNet Technology connects your business applications for seamless business operations as well as providing tailored application integration solutions. When you have an industry specific business requirement that cannot be met by an off-the-shelf package, we can help.

Our end-to-end custom application development practice provides innovative solutions from initial inception through to final deployment and ongoing support and maintenance, and allows for fully integrated operations.

FocusNet Technology has delivered applications for organisations across a variety of industries. Solutions provided include and are not limited to: ERP, Job Management Systems, CRM database, portal and collaboration, Intranets, migrating legacy applications to current standards based systems, business applications, Web services, plus wireless and mobile solutions.

Our Project teams apply and utilise ITIL and Six Sigma methodologies, which combines best practice in the design of a project, the process and quality management.

Our application development services teams consist of staff in both a consulting & technical capacity.

✔ Full custom software development
✔ Modification of existing software
✔ Integration to existing systems
✔ Design, installation, configuration of development & testing
✔ Large range of programming systems
✔ Web & application development
✔ Business requirements & analysis
✔ Comprehensive maintenance & support

Also possessing a variety of specialist skills relevant to the solutions we deliver day-to-day, FocusNet Technology provides services for short to long-term engagements in a variety of configurations from single resources through to entire project teams, as required.
